MAJDOUBI MARAM

AI & DATA STUDENT / EPI

majdoubimarame01@gmail.com

CURRICULUM VITAE

AI and Data student interested in intelligent systems, computer vision, and practical software. I enjoy turning ideas into thoughtful products - from accessible communication and smart agriculture to web and desktop applications.

TECHNICAL STACK & SKILLS

Programming	Java (21/26), Python, PHP (8.2)
Frameworks	Symfony (7.2), JavaFX (25), Spring, Node.js, Express, Tailwind CSS, DaisyUI, Stimulus JS
Data & persistence	MySQL, SQLite, Doctrine ORM, Maven, Java object serialization
AI, vision & cloud	Computer Vision, YOLO-X, MediaPipe, OpenCV, LLaMa 3.1, OpenRouter, AWS Cloud Foundations
Design & tools	Figma, Git, SSH, AlwaysData, EasyAdmin 4, FullCalendar, Symfony Workflow

SELECTED PROJECTS

PlantGuard AI - Plant disease detection

Computer vision project exploring plant disease detection with the YOLO object detection approach.

AI / COMPUTER VISION / YOLO

SignTalk AI - Sign-language communication assistant

Intelligent communication assistant concept exploring AI-supported sign-language communication and more accessible interactions.

AI / SIGN LANGUAGE / ACCESSIBILITY

ChargeNow - EV charging app concept

Figma UI/UX concept for EV charging, with smart station discovery, vehicle setup, live battery data, and an AI recommendation assistant. The design also covers virtual queues, QR session starts, charging alerts, overstay billing, and an admin dashboard.

FIGMA / PRODUCT DESIGN / EV

MediClin - Medical appointment platform

Symfony 7.2 and PHP 8.2 platform hosted on AlwaysData with MySQL. Includes patient, doctor, and administrator roles, appointment workflows, REST slot allocation with FullCalendar, notifications, and a rate-limited LLaMa 3.1 chatbot with local failover.

SYMFONY / PHP / MYSQL / FULLCALENDAR

SELECTED PROJECTS - CONTINUED

NeoBank Pro - Fintech JavaFX application
Object-oriented banking management app built with Java 21/26 and JavaFX 25. Uses SOLID principles, design patterns, Java collections, custom exceptions, binary serialization, and a reactive dashboard with a custom dark theme.
JAVA / JAVAFX / SERIALIZATION

CountAI - Person counting & tracking
Experimental computer vision system deployed for testing occupancy, real-time person counting, and individual tracking in spaces such as cafes and offices.
COMPUTER VISION / YOLO-X / TRACKING

MediaPipe Face Mesh tool
Python tool using OpenCV, MediaPipe, and NumPy to track 468 facial landmarks and estimate 3D head pose (pitch, yaw, roll) from images, video, or a live webcam stream.
PYTHON / MEDIAPIPE / OPENCV / NUMPY

CERTIFICATIONS & CONTINUOUS LEARNING

- **AWS Academy Graduate - Cloud Foundations** - 20-hour training badge
- **Cisco Networking Academy - CCNA: Introduction to Networks** - Course completion certificate, March 2026
- **Cisco Networking Academy - Introduction to Cybersecurity** - Course completion certificate, March 2026
- **WENOW Academy - UML modelling & Scrum methodology** - Three-day training, July 22-24, 2024
- **Workshops** - YOLO-X object detection, computer vision, and AI orchestration patterns

PUBLICATIONS & COMMUNITY

SQL Simplifie - Apprendre les Bases de Donnees - Authored a 52-page, seven-chapter guide to database concepts, SQL, data manipulation, and query optimization.

jQuery Developer Guide - Created a practical three-page guide to DOM manipulation, event handling, animations, and AJAX.

ASEAI 2025 - Presented at the 1st African Winter School on Software Engineering & AI, Sousse, Tunisia, November 2025.

Ideathon 4.0 - The Jungle Expedition - Participated in the event organized by GDG on Campus EPI and NATEG ISSAT Sousse.
